# TEBOGO MELITA RAKOTO

**DIGITAL ASSOCIATE | DATA ANALYTICS | DATA ENGINEERING**

Alberton, Gauteng, South Africa | 071 198 9721 | melitahrakoto88@gmail.com
*LinkedIn:www.linkedin.com/in/tebogo-rakoto-1b8355210/?lipi=urn%3Ali%3Apage%3Ad_flagship3_profile_view_base%3BV3rdasnrQRSi6ciG%2FJAFjQ%3D%3D*

## PROFESSIONAL PROFILE

Mathematics and Computer Science graduate with a foundation in computer science, statistics, data analysis and programming. Currently a Digital Associate at CAPACITI, developing practical digital and data skills through collaborative projects. Experienced in supporting mathematics learning, capturing and maintaining records, preparing reports, and using analytical tools to interpret data. Interested in applying problem-solving, attention to detail and continuous learning to data-focused roles.

## CORE SKILLS

**Data analysis and reporting:** Excel, PivotTables, data cleaning, data interpretation, KPI reporting
**Data visualisation:** Power BI dashboards and reports
**Programming and web:** Python, SQL (fundamentals), JavaScript, HTML, CSS, PHP, C++
**Statistics:** Statistical analysis, regression, time-series analysis; exposure to SAS and SPSS
**Tools and collaboration:** Git, GitHub, Visual Studio Code, Microsoft Office, teamwork and documentation

## PROFESSIONAL EXPERIENCE

### Digital Associate

*CAPACITI | September 2026 – Present*

- Participate in practical digital-skills development and collaborative project work.
- Contribute to team-based development activities using GitHub for version control and collaboration.
- Apply analytical thinking and structured problem-solving to data-focused tasks and project requirements.
- Work with peers to coordinate tasks, integrate work and test project deliverables.

### Teacher Assistant / Mathematics Academic Support

*Department of Education – Loretto Combined School, Limpopo | June 2025 – August 2026*

- Supported mathematics teaching and learning for learners in Grades 4–7.
- Assisted learners with classroom activities and reinforced mathematical concepts.
- Captured learner information, maintained records and helped prepare reports.
- Monitored learner performance and supported teachers with academic administration.
- Communicated professionally with teachers, learners and parents while contributing to a supportive learning environment.

## SELECTED PROJECTS

**Customer Sentiment Analysis | Python, TextBlob and Power BI**
Processed customer-review data in Python, classified review sentiment and prepared category-level insights for visualisation in Power BI.

**Smart Ticket Classification Engine | Team Project**
Collaborating on a ticket-classification solution for a corporate convenience ticketing context, including shared-repository development, task integration and testing.

**First-Time Mother Support Chatbot**
Worked on a chatbot concept intended to help first-time mothers navigate common questions and access organised support

**TeacherMate Learning Content Generator**
Developed an education-focused content-generator project to help teachers prepare worksheets, lesson plans, quizzes and supporting learning materials.
formation

**Call Centre Data Analysis | Excel**
Explored call volumes by hour and day to identify patterns and support operational reporting.

**Power BI Dashboards and Reporting**
Prepared data visualisations and dashboard views to summarise key measures and make information easier to interpret.

**Patient Care Website | Web Development**
Developed a website project focused on presenting patient-care information using web technologies.

**Statistical Analysis Projects | SAS, SPSS and Statistics**
Applied statistical concepts and data interpretation techniques to investigate patterns and communicate analytical findings

## CERTIFICATIONS AND ONLINE COURSES

**Generative AI: Prompt Engineering Basics** — IBM
**AI For Everyone** — DeepLearning.AI
**Introduction to AI** — IBM
**Python for Data Science, AI & Development** — IBM
**Introduction to Generative AI** — Google Cloud
**Supervised Machine Learning: Regression and Classification** — DeepLearning.AI
**Unsupervised Learning, Recommenders, Reinforcement Learning** — DeepLearning.AI

## EDUCATION AND TRAINING

**Bachelor of Science (BSc), Mathematics and Computer Science** — University of Limpopo (Completed 2024)
**FNB App Academy – Web Development** — HTML, CSS and JavaScript (2025)

## ADDITIONAL INFORMATION

**Career interests:** Data analytics, data engineering, Business Analyst, Business Intelligent and Software developer
**Professional strengths:** Analytical thinking, communication, teamwork, record keeping, problem-solving and willingness to learn.
